Sagar Bongu

Programmer Analyst

Experience Summary:

- 3.9 years of IT experience in Application Development, Implementation of web Applications on MERN technology In Cognizant Technology Solutions.
- Extensive experience in design and development of web applications using React.js, Node.js, Express.js, and MongoDB.
- Skilled in implementing reusable and responsive components using React.js for seamless user experiences.
- Proficient in managing backend development using Node.js and Express.js to create efficient APIs and server-side logic.
- Experienced in MongoDB for database design, data modelling, and optimization to handle complex data structures.
- In-depth knowledge of version control systems like GIT for managing code repositories and collaboration.
- Experienced in implementing authorization and authentication in applications.
- Experience in handling the Production Support, patching activities along with handling the application development.
- Ability to manage Agile Development and SCRUM methodologies, ensuring smooth project execution and timely delivery.
- An efficient communicator with good leadership, mentoring, coordination, and interpersonal skills.

Technical Skills:

Front-End	HTML5, CSS3, JavaScript (ES5/ES6), React JS, Redux, UNIT Testing
Server	Node JS, Express JS
Backend	Node JS, REST API, JWT
Database	MongoDB
CI/CD	Docker, Vercel, Render, Github

Technical Experience:

Client: - Anthen Inc (Sep2023 – Till)

Role: - Full Stack developer

Technologies Used: - Html, CSS, JavaScript, Redux, React JS, Node JS, Mongo DB, Express JS.

Role and Responsibilities: -

- Build responsive and interactive user interfaces using React.js.
- Ensure smooth navigation and user experience for customers viewing dashboard.
- Develop server-side logic using Node.js and Express.js for REST API's.
- Create secure API's for handling user authentication and authorization.
- Design and maintain MongoDB schemas for storing user data, claims and all required fields.

Client: - Ace-Hardware (Jul2022 – Aug 2023)

Role: - Full Stack developer

Technologies Used: - Html, CSS, JavaScript, Redux, React JS, Node JS, Mongo DB, Express JS.

Role and Responsibilities: -

- Create an intuitive and visually appealing user interface using React.js.
- Implement features like product search, filters, and sorting for easy navigation.
- Develop server-side logic using Node.js and Express.js for handling user authentication, order processing, and inventory updates.
- Build secure APIs for seamless communication between the front-end and back-end.
- Design MongoDB schemas to store product details, customer information, and order history.

Educational Qualification:

- Bachelor of Science: MPC (specialization in mathematics) Andhra University – Visakhapatnam JUL 2018 – AUG 2021.
CGPA: 8.43/10
